MODERN SPEECH GENERATING DEVICES BUILT ON THE APPLE IOS PLATFORM

The ComLink ProSlate™ Series is a line of light weight, sleek and stylish AAC devices available in a variety of sizes and colors. The iOS based devices are capable of handling all of your communication needs by leveraging the latest and greatest AAC apps. With a rugged design and backed by the best warranty available in the industry, you can rest assured that you will enjoy your ProSlate™ for years to come.

5 YEAR WORRY-FREE WARRANTY INCLUDED

Our commitment to quality and confidence in our product is proven with the ProSlates' best-in-industry warranty. When you choose a dedicated ProSlate™, we'll include a 5 Year Worry-Free Warranty to protect you against all types of damages that may occur. This means no more down time waiting for funding for repairs. We have you covered!

PATENT PENDING FLEXABLE® HANDLE AND STAND

Included with each device, the FlexABLE handle and stand is an ergonomic innovation that solves positioning and handling issues for anyone who interacts with the device regardless of their level of dexterity. The patent pending design provides infinite angle adjustment and can be easily folded flat or extended by the user. The FlexABLE® rotatable handle and stand magnetically locks into position to support both the landscape and portrait orientations.

TRUE-HOLD™ KEYGUARDS WITH MAGNETIC ATTACHMENT

The ProSlate™ Series has a variety of keyguards available to support different layouts and button densities. Their sleek, one piece design is easily interchangeable and there are not any hinges or straps to break or wear out. Keyguards feature soft-to-touch edges and are 1/4" thick so you don't have to worry about accidently activating the screen because the design requires you to intentionally drop in to the button cut out.

WIRELESS SWITCH ACCESS

Access the ProSlates' applications using ability switches such as Buddy Buttons, Leaf Switches, Sip and Puff Switches and more. Best of all, using the wireless switch adapter module, you'll eliminate cords that often get tripped over and damaged.

FRONT AND REAR FACING CAMERAS

With front and rear facing cameras, you can quickly shoot photos of rooms, objects and people. Photos can quickly be placed on vocabulary cells or used for Visual Scene Displays. This is extremely useful for clients with Aphasia.

WEARABLE SOUNDPOD™ SPEAKER MODULE

Now your voice output can come directly from your person rather than the device! The SoundPOD™ wearable speaker* magnetically docks to the back of the device and can also be removed and attached to the neck lanyard and worn by the user.

Unlike traditional AAC device design, a SoundPOD™ user's voice comes from their neck area and the speaker can be concealed under clothing. This results in the communication partner looking at the face of the AAC user instead of at the device.
* Patent Pending

CHOOSE YOUR AAC APP

Take full advantage of the best apps available! When you order your ProSlate™, we'll pre-load your AAC software of choice. Here are a few of the most requested Apps:

Grid Player   PRC LAMP   Proloquo2Go   SonoFlex   TouchChat
